PROFESSIONAL EXPERIENCE:

Organization :

Organization: Infosys Limited

Designation: Senior Associate Consultant

Duration : September 2021 to present

PROJECT DESCRIPTION:

Project :

Client : Telstra Corporation

Project Name : Telstra Plus Rewards Store, PaaS micro frontend
Role : Software Engineer

DESCRIPTION:

Telstra corporation is an Australian telecommunications company that builds and operates telecommunications networks and markets voice, mobile, internet access, pay television and other products and services. Telstra is the largest wireless carrier in Australia, with 18.8 million subscribers as of 2020.

As part of Telstra, we build and launched Telstra Plus Rewards Store platform which is a customer facing eCommerce platform. We provide a clean and simple digital experience for our customers to spend T+ points on an amazing range of rewards. These T+ points can be earned through availing various services such as buying mobile, internet access, pay television and other products from Telstra by spending money.

ROLES & RESPONSIBILITIES:

- ✓ Solely interacting with the clients from Australia for gathering new requirements in the workflow.
- ✓ Closely working with the visual designer and ux designer to build new screens.
- ✓ Taking active participation in converting client requirements into Jira stories and implementing them as per requirement.
- ✓ Taking full responsibility to deliver a feature on time from building new components to deploy in production using CI/CD.
- ✓ Single handedly made the project accessibility compliant so that disabled people can make use of the platform.
- ✓ Fixing issues actively and making sure if the issues are going live and not repeating.
- ✓ Thoroughly supporting the application using various tools i.e SPLUNK, iTAMs, PagerDuty.
- ✓ Fixing small issues on the checkout flow of the application which is in Angular.
- ✓ Developing and deploying the application following Agile methodologies.
- ✓ Participating in daily Scrum activities like Standup, Sprint refinement, Sprint retrospective and Sprint planning using JIRA.
- ✓ Review code and suggest coding standards to the team.
- ✓ Adding test cases using Web Test Runner and running them on different browsers to test e2e using Playwright.
- ✓ Leveraging the advantages of Rollup and Vite to build web components/micro frontends.
